JUAN IGNACIO SALEME

BACKEND DEVELOPER

Hello, I am a **backend developer** currently residing in Argentina. At 21 years old, I have been **programming for three years now**. Over the course of these years, I have gained experience working in various educational institutions and have honed **my skills in team management and project execution.**

As a developer, my **objective** is to **solve problems and improve systems** to better serve people. I believe that **I can add value to any workplace I join**. As a professional, **my goal is to achieve a senior position in the future**, learning from those who hold such positions and continuing to contribute to the community.

Thank you for considering my application, and I look forward to the opportunity to discuss my qualifications further.

SKILLS

- **Adaptation to the situation**, I was in several situations where a member or several of my team left it, so I had to make up for their absence.

- **Responsability**, i allways reach my tasks on the period of time given.

- **Comunication**, in almost all the projects were i had the oportunity to work on, i take the rol of leader, easing the tools and workspace to keep a good cordination and administration, so with that experience i learned how important is the comunication with my team and coworkers.
